of strengments.

of str ments amounts to \$111, 134.79; the surplus a 357,676.57. This surplus in rather uner than over what may be expected anunity. It is evolunt, therefore, that the urplus wat a revenue in this city would ctor in the solution of the general waer question for the city, if it could be allowed to accumulate for that purpose This was fully shown in the report of the Commercial Chris committee in the cortion which related to the financing He gives the number of men employed

If come to be a sound proposition that the pater pervise, which needs so much drangthen it, ought not to be drawn unn for revenue for the city. It seems cione, plan, that if the revenue from the at P is made evident that you are water accommons and rates had been allowed to accumulate in a water first, most upod the world will look for theority. It seems equally clear, that

Superinteleasest Blank makes come communications in regard to the verthe, but recessary. The Emigration does should be done away wills; the waer for sprinkling should come from othat sources then the hydramian the small sights should be informate; and the waer-more should hav for what they get. It is a good, practical report, and the Council will do well to give it whose sees tayorable consideration;

THE BACON RESOLUTION.

It is quite thus, as stated by Senator Lodge, that the adoption of the resolution affered by Senator Bacon of Georgas would be a contession of wrongcome on the part of this country, and it commendable, having would encourage the Colombians in where work turn that of their belief that they have just commores it would be an invitation to them to open hostilities, and to proceed in to be speled in time to other then, gest, against a big bully which has admitted its wrong. It would have the came effect in inciting new and warming up ancient hostile feeling in Colomthe against this country, that the anti-Imperialist propaganda had in the Philspanies, and which was responsible for the proforgation of the insurrection there. This part of talk in the Collect. States always has the effect among ment on a little and they would be world that the persons making it have distraction on it for their supply of in mand is any real ald to the people who look to it for help against the Uni-

and States. The Bernel performed St. Louis. To be sure, Senator Bacon disclaimed market. But in any event, it will no any lutent to give such encouragement to the Colombians; but to give such encounsecment is the only possible effect of his resolution. For it expressly in- for graving, as demanded, would have to vites Colombia to enter proceedings against the United States for the Adullustration's acts in the matter of aids ing the successful revolution in Panama, inclining "the alleged aid and as-Istance by the hand and naval forces of he United States," in the forcible preention of Colombia from asserting her overeignty over Panama, to the end that full compensation may be imple to colombia for our alleged wrongful mets connection with the matter.

All thus, of course, Is a clear invited ion to trouble; it puts the United States in the position of admitting internationof piracy, but as willing to pay for her committat acts. It is a bit of stupendous tolly; a glaring and monstrous attempt to condens an admitted ering by the payment of money. It is not at all likely that Senator Eucon will be able to command even the votes of all his fellaws Bearsonair for his badly blundered

political move. lay of a substitute, takes all the venero out of the partisan proposition made by haves, this country will do what it can of the facus of refunding to officer all differences that may exist Between Colombia and Panama; but consult to appear at the bar of justice an a colorit, wever!

> The confidence of the European pay ers in the maintenance of peace is justined if it is true as stated that they have reached un agreement to fender their good offices toward the Reeping of the peace, as a just resort. This will mean, no doubt, that the chief powers will not only enforce peace; but that they will have a hand in limiting and defining Ruesia's "sphere of influence" and possessions in Manchuch and Kon, as well as Japan's. It will very likely mean, also, that those chief powers will take their toll from China

for the "protection" afforded, We understand that it is conte plated to renew the fire drills in schools of this al habt but occasio the might show

view of the fact, however, that the former installation of these drills was difficulty than from the pitchblende attended by the death of a nupil in with which Madame Curie made her one of the schools from the shock atexperiments. From all the facts, it tending the starm, we should like to seems clear that the radium referred suggest that the call to this drill be to in the New York dispatches is not as fittle starfling as efficiency in it will admit. Even in the event of a real fice, the loss startling the alarm, the less the disturbance to the nerves will be, and the more efficient the performance of what is needed to be done

THE COAL MINE INSPECTOR'S REPORT.

From the report of Coal Mine Inspector Gomer Thomas it appears that the coal mines of Carbon county are fairly well supplied with men; that the workings are in good condition, and that the miners are centented with their pay and surroundings. He found the weighing-scales correct, the proper precitia very few years; be an important gions taken in instruction the new men and the working conditions generally as good as could be expected.

Inspector Thomas makes a report on sich mine, covering the time from December 26th to January 10th, instant in each mine, with the quantity of coal put out from each mine daily. This sutput Di very good; it shows that the miners have no need to fear that they will fail of producing the needed coal, nor the people to fear a shovings. This is the main point, and on this it is good minecut Croude Gatoria of special sigafficance, as it is from their that the coke comes. No mention, however, is made of the firing in of the coke ovens.

An important recommendation made nount to arrange to make substituted by Imspector Thomas is that the long ton" of 2310 pounds be done away with and the ordinary too of 2000 pounds be used for all purposes. The mines are producing 42% tons of coal per day; in some of the house this being well up to the normal cuitout.

THE LIVE-STOCK MEN.

The demands formulated by the tive. stock mon in their convention just held at Portland, look primarily to the hotterment of methods affecting their own business, but they also appeal to the good sense and humanity of the country

They, ask for improved service in the namilling of trains of stock in transit; for speed in the service, and for beiter opportunities to rest and feed the aulinals. These demands, while obviously to the advantage of the shipper, commend themselves to the humane instircts of the public; they not only conplaint against us. It would do far template the delivery of the cattle in the best possible condition, but complionce with them will reduce to the minmum the distress of the animals on their journey. This will naturally be a matter of adjustment between the more ciotion and the rallroads, and it is to be hoped that it may be capable of adjustment-without calling upon Congress for heighetiet foon. The demand for a classified census of

live slock is in the interest of the general public quite an much as in that of light-minded peoples of making them to know from time to time the numbers. think that it means more than it floor; condition, clauses, and location of our that somebody in this country is going | beer supply, so that better knowledge to help them, when in thei all that is can be had of the market and of the anned at here is a political play for rightful prices. In this connection, the leterminution of the stockmen to start a packing plant of their own is important, and if they don't combine with the plants already in operation, their plant qualit to be a powerful regulator of the The use of the Government reserved he with restrictions that would not imperil the very abject of the reserves For instance, at the headwaters of the streams It would not do to have the brush destroyed that holds the snow. for could it be tolerated that the stock could foul the water depended upon for ulinary and potable purposes by the people in near-by settlements. As it is, the Government is rather liberal on this point, and it might possibly be dangerour to push too far on this line. If it is: supposed that the transfer of the control of this subject from the Interior Department to the Department of Agriculture, in asked, would result in laxity, that vould be a reason why the transfer should not be made; but we don't be-

deve that it would have any such result. Finally, the commendation of President Roosevelt for his course toward Panama inight will have been subject to modification on account of baste at some points; and the applauding of the enterprise of building that canal as the rowning event of the Twentieth Century may possibly be premature, for the entury is young yet, and many things may will be done in it. Certainly, for instance, it would be a greater and more costly enterprise to build this canal on the Micaragua route, as Senator Morgan insists shall be done, than to build it at

The general tone of the convention vas carnest and businesslike; it was a ive meeting of live-stock men and its deliberate declarations are deserving of onsideration and the highest respect.

The revival of the iron industry and the vigorous opening of the coke season are both excellent indications of the industrial and manufacturing outlook for the new year. The repeated cuts in the price of pig iron have apparently stopped, foreign orders having taken all the cheaper offerings. The openings of iron furnaces are generally at a derease of wages, but where men get 38 to \$15 a day for their work, as they have been doing in the Illinois Steel company's works, at South Chicago, they as stand a substantial cut and still be

PROTECTING PA AND THE BOYS.

From the Chicago Record Heraid. A London paper a few days ago published an advertisement in which an English lady set forth her desire to employ a governess for her three daughters. There is nothing remarkable in the fact that an Englishwoman should desire to have her daughters placed under the supervision of a governess, but may the conditions that are laid down. mark the conditions that are laid down In the first place, it was specified that the governess must be "plain," and in order that there could be no doubt in the mind of anyone who might think of applying for the position, the following explanation was inserted: "Brilliancy conversation, fascination of manner and symmetry of form objected to, as the father is much at home and there re grown-up son:

It is evident that the estimable advertiser is no superficial observer of hu-man nature. She knows that there are other things in addition to pretty faces which attract men.

HEROIC CURES.

From the Boston Globe.

We read of two wealthy ladies in Connecticut who have been sleeping out all night on their verandas, in order to freeze out the microbes of consumption. The thermometer registered 39 deg. be-ow zero, and they say they are better

In Russia the most eminent physi-In Russia the most eminent physicians frequently prescribe ice baths, Wealthy noblemen are seen approaching bonds in the country, where accompanied by attendants, they cut a hole in the ice in zero weather and take a "din," which lasts but a very short time, however. They are then wrapped in thick furs, when the attendants runthem till the skin is aglow. The best of results are experienced, they take no cold and some have been known to take. cold and some have been known to take, such baths for twenty years. Heroic cures often prove effective.

GAMBLING AT GOLF.

Even the London Court Journal. Although we have not yet reached the gambling-at-golf" stage of the discussion upon the desirability or not of laying golf for a stake, the questions being discussed with some fervor There can be no doubt that the gamb-ling taint has touched the royal and unclent game and that there are many players who have grown to look muon it as insiplit without the incentive of "something on the match."

PERSONAL MENTION

Edward Scileck, a freight clerk of San Francisco, paid 25 per an old building re-cently, and while fearing it down for kinding wood found a bag containing \$250 in gold.

An English journalist in Herlin declares that the German Crown Prince is not his father's favoritie son, and that no one who has seen the Kalier with his hors can doubt that he prefers Effel to his older brother. The Grown Prince is kept very much in the background on most occusions. 16 10 14

W. J. Hannan, who resides at Corning, Tehama county. California, is undoubtedly the object active extrement in the Pated States, it not in the whole world. He is over lift-years of age, but is still in good health and alter to get around as itsely and do as much work as many a craftenan half a century younger.

Squire Thomas Poe of Rushville, Ind., has long celebrated his unicly-second bettering the leastly active and attendate his duling the leastly active and attendate his duling as Institute of the Peace with regularity and his decisions are regarded theorythom. I have been as uniformly fattened fadicial. He has occupied the office of Justice of the Peace in the town for letty years. He has been an involvant tobacco chewer for eights years. bocco chawer for eights years.

Mayor Robb of Lima, O. med himself his other memins. Frank Thedick was rought before him charged with abbatic facility. The wite and four small chillen appeared, poorly clad and with method faces. His limor was nuzzled to the face the mail it would mean a july entire and the facel the mail it would mean a july entire and the facel.

SPICE.

"Well, well! so they're married. He first began to be attentive to her one day when be took her skating and "Ah' begun at the foot, ch." -Philadelphia Press. 8 4 5

"Well, Snowball," said the patron to the dusky watter, "how did you ever come by a name like that?"
"Well, sah, I was born in Chicago, Reckson yer never seed a Chicago snow-ball, sah!"—Yonkers Statesman.

what's that for?" inquired the writer of the old man who slipped him a permy. "That's for you," replied the old man. "That's for you," replied the old man. "On! Well, well, Mr. Sage, how were things in New York when You left?" things in New 1915. Phillidelphia Press.

"One of the component parts of sugar," and the professor, "is an essential in the opposition of the human body. What is "I know," shouted the grocer's boy.
